

AUTOMATED SOUND INSPECTION SOLUTION

Designed for Cladding and Hardfacing

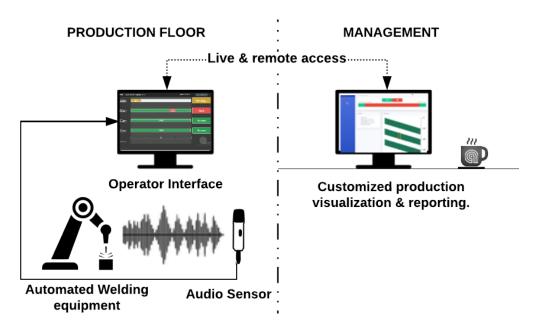

- Technology that continuously guides your operator.
- Optimise your production process using audio.

WWW.AUTOMATIONACOUSTICS.COM

Simple, Smart & Automated inspection system

SoundWeld is an industrial microphone, powerful software and simple display specifically developed for the flawless integration with your existing equipment.

- **Reduce production costs** by identifying and locating production issues before they become expensive problems.
 - **Improve your productivity** by optimising your welding parameters with full traceability.
- <u>کې</u>

1

Visualise your production for operator feedback and management dashboards with high resolution.

No upgrades or training required for your equipment or staff. The system is ready to be use by anyone.

Increase productivity and let system pay itself in weeks, not years.
